EDUCATION

University of International Business & Economics

September 2024 - Present

M.S in Quantitative Investment (MF). GPA: 3.97/4

Dongbei University of Finance & Economics

September 2020 - July 2024

BA in Finance, Minor in Investment. GPA: 4.36/5; Rank: 1/19

PERSONAL STATEMENT

Research Software

Python, R, Stata, Origin, LaTeX, Microsoft

Research Interests

Empirical Asset Pricing, Quantitative Investment, Machine Learning;
Complex Network and Financial Risk Management

Certification

FRM Exam I; CET-6: **536**

PAPER

1. The Vanishing Diversification?—A Theoretical and Empirical Study of Risk Contagion Factor via GAE Neural Networks, 2025, Independent author, Working Paper.
2. Influencing Factors of Liquidity Commonality in Chinese Financial Market: Analysis Based on Bayesian Networks, 2024, with Feng,X., Zhao,N., *Operations Research and Management Science(CSSCI)(Accept)*
3. Network Collaboration Self-rescue Strategies to Block the Spread of Liquidity Crisis, 2024, with Zhao,N., Luo,J.* *Conference Paper*.
4. Pre-alarm Financial Systemic Risk Contagion Monitoring Based on Time-varying Dynamic Bayesian Complex Network, 2024, with Zhao,N., Wang,Z.S.*, *Managerial and Decision Economics(SSCI) (Minor Revise)*
5. How Dynamic Industry Sector Linkage Drive Risk Contagion: Evidence from China's Bayesian Time-Varying Complex Network, 2024, with Zhao,N., Wang,Z.S.*, *Financial Markets, Institutions & Instruments(SSCI)(Under review)*

EXPERIENCE

Research Group in UIBE

2024 - Present

- **RA:** Lin William Cong, Yuanyu Qu, Guojun Wang, *Blockchains for Environmental Monitoring: Theory and Empirical Evidence from China, Review of Finance, 2025, rfaf033.*

Contribute to: Collect and clean billion-level big data; Textual analysis; Python data crawler.

Financial Stability Research Group in DUFE

2022 - 2024

- **RA:** of National Natural Science Foundation of China (72001035); Basic scientific research project general project of Liaoning Provincial Department of Education (JYTMS20230670).

Contribute to: Systemic risk and Liquidity risk measurement; Complex network; Optimization algorithm.

- **Clearline**—A financing interactive model Based on phased decentralization of blockchain.
- **Opt-Liquidity**—risk warning and liquidity optimization system for commercial banks based on DeepAR.

ACHIEVEMENTS

ICBC-Cup National University Student Financial Technology Competition, **National Prize**

2023.03

Citi-Cup Financial Innovation and Application Competition, **National Prize, 3rd**

2022.06

Excellent graduation thesis in DUFE

2024.05

Liaoning provincial government scholarship

2022.12

1 st comprehensive scholarship in DUFE

5 times

Others.....

CONFERENCE

2024 SESC - The 23RD Annual Academic Conference—Financial Engineering

China, Hefei

2024 Winter Institute on AI for Social Sciences and the Economics of AI

China, Beijing
