EDUCATION

University of International Business & Economics

September 2024 - Present

M.S in Quantitative Investment (MF). **GPA: 3.97/4; Rank: 1/32**

Dongbei University of Finance & Economics

September 2020 - July 2024

BA in Finance, Minor in Investment. **GPA: 4.36/5; Rank: 1/19**

PERSONAL STATEMENT

Research Software

Python, R, Stata, Origin, LaTeX, Matlab

Research Interests

Empirical Asset Pricing, Quantitative Investment, Machine Learning;
Complex Network and Financial Risk Management

Certification

FRM Exam I; CET-6: 536

PAPER

1. The Vanishing Diversification?—A Theoretical and Empirical Study of Risk Contagion Factor via GAE Neural Networks, 2025, with Yuanyu Qu, submit to *Journal of Management Sciences in China*(CSSCI).
2. A Bayesian Network Approach to Analyzing Common Factors of Market Liquidity, 2025, with Feng,X., Zhao,N., *Operations Research and Management Science*(CSCSI) (**Accept**)
3. Network Collaboration Self-rescue Strategies to Block the Spread of Liquidity Crisis, 2024, with Zhao,N., Luo,J.* *Conference Paper*.
4. Pre-alarm Financial Systemic Risk Contagion Monitoring Based on Time-varying Dynamic Bayesian Complex Network, 2024, with Zhao,N., Wang,Z.S.*, *Managerial and Decision Economics*(SSCI) (*Minor Revise*)
5. Network Mechanisms Underlying Absence of Cascading Bankruptcies: Evidence from Chinese Markets, 2024, with Zhao,N.*, Wang,Z.S., Chuang, C-H., *Working Paper*

EXPERIENCE

Research Group in UIBE

2024 - Present

- **RA:** Lin William Cong, Yuanyu Qu, Guojun Wang, *Blockchains for Environmental Monitoring: Theory and Empirical Evidence from China*, *Review of Finance*, 2025, rfa033.

Contribute to: Collect and clean billion-level big data; Textual analysis; Python data crawler.

Financial Stability Research Group in DUFE

2022 - 2024

- **RA:** of National Natural Science Foundation of China (72001035); Basic scientific research project general project of Liaoning Provincial Department of Education (JYTMS20230670).

Contribute to: Systemic risk and Liquidity risk measurement; Complex network; Optimization algorithm.

- **Clearline**—A financing interactive model Based on phased decentralization of blockchain.
- **Opt-Liquidity**—risk warning and liquidity optimization system for commercial banks based on DeepAR.

ACHIEVEMENTS

1 st comprehensive scholarship in UIBE

2025.10

ICBC-Cup National University Student Financial Technology Competition, **National Prize**

2023.03

Citi-Cup Financial Innovation and Application Competition, **National Prize, 3rd**

2022.06

Excellent graduation thesis in DUFE

2024.05

Liaoning provincial government scholarship

2022.12

Others.....

CONFERENCE

2024 SESC - The 23RD Annual Academic Conference—Financial Engineering

China, Hefei

2024 Winter Institute on AI for Social Sciences and the Economics of AI

China, Beijing
